EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with Edward (Ted) Yoo on 08/16/2004. The application has been amended as follows:

The claims:

Claims 1-26: delete "previously".

Claim 37: delete "previously added" and insert -- previously presented --.

Claim 38: delete "previously added" and insert -- previously presented --.

Claim 46: delete number "46" and insert number "44".

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Note that the 112 claim rejections and the art rejections are considered moot in view of the cancellation of claims 27-36. The inclusion of the solid particles with the particle size less than about 1 micron comprising a first portion and a second portion wherein the average particle size of the first portion is larger than the average particle size of the second portion renders the claims unobvious over the prior art. Graphs A and B of Sago shown in figure 3 illustrate that there are no two groups of the particles with size less than 1 micron. One of ordinary skill in the art would not be motivated to look to the prepreg material of the Miyamichi reference (US 5,512,351) for the size

of metal oxide particles since Miyamichi teaches the prepreg material containing only one group of the particles with an average particle diameter less than 1 micron.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
